Yes i'm writing on behave of my father and his friends. They are all truck drivers and all have xm radios. They need the traffic and weather stations because of them being on the road and needing to know what the weather and roads are like in others states, states they travel through. They are gone 5 days out of 7 and sometimes they travel through rough weather. We as there family feel safer that they can know the weather and traffic ahead of time too avoid problems and bad weather. So for my dad and his fellow driving partners we oppose HR 4026 that take the traffic and weather stations off the air. Because without truck drivers the U.S. would have nothing. We oppose HR 4026 bill: Michael and Diane Morgan, Darrell and Vicki Jackson, Keith and Bonnie Phillips, Jim and Kay Smith, Patrick Rineheart, James Smith Jr. and all the other truck drivers out there that need the traffic and weather stations.
